PARIKSHITH T. T

Computer Science Engineering Graduate

Hassan, Karnataka | +91 7676303961 | pparikshith26@gmail.com | linkedin.com/in/parikshith-t-t | github.com/pari2004

PROFESSIONAL SUMMARY

Results-driven software development engineer with hands-on experience in full-stack web development, AI integration, and distributed data systems. Adept at building scalable applications, architecting clean backend workflows, and leveraging modern frameworks to deploy reliable software solutions.

TECHNICAL SKILLS

AI & Agentic Systems: AI Agents, Agentic Frameworks (LangChain, CrewAI / AutoGen), Prompt Engineering, Function Calling / Tool Integration, LLM APIs, Retrieval-Augmented Generation (RAG)

Languages: Java, Python, SQL, JavaScript, HTML5, CSS3

Machine Learning & Data: TensorFlow, Natural Language Processing (NLP), Apache Spark, Deep Learning

Frameworks & Libraries: Spring Boot, RESTful APIs

Developer Tools & Platforms: Git, GitHub, Linux, Version Control

Core Competencies: Full-Stack Web Architecture, Multi-Agent Orchestration, OOP, Data Structures & Algorithms

EDUCATION

Bachelor of Engineering, Computer Science Engineering, 2026, *BGS Institute of Technology, BG Nagara, Karnataka | CGPA: 8.13*

12th Grade (PUC), Science 2022 *Jnanasagara PU College, Hassan, Karnataka | 73%*

10th Grade 2020 *Sanvi Public School, Hassan, Karnataka | 86%*

EXPERIENCE

Fortivex AI | Bengaluru, India

Software Development Engineer 1 | *Present*

- Design and implement full-stack features for AI-powered web applications and core platform services.
- Collaborate cross-functionally to integrate machine learning models and data pipelines into production environments.
- Optimize database queries and server-side logic to ensure low latency and high availability.

Sansera Engineering Limited | Bengaluru, India

Engineering Intern | *Sept 2025 – November 2025*

- Gained hands-on industrial experience applying software and engineering principles to real-time manufacturing and operations workflows.
- Collaborated with senior engineers to identify process bottlenecks and implement technical solutions.

PROJECTS

Pravasa Payana – Travel Content & Digital Branding Platform | 2025 – Present

- Built and managed a travel-themed platform focused on destination exploration and travel awareness.
- Created digital content, managed social media campaigns, and analyzed engagement metrics.
- Applied skills in content strategy, branding, marketing, and audience growth.

Irrigation Prediction using Machine Learning in Precision Agriculture | 2025–2026 *(Final Year Project)*

- Developed a hybrid physics and machine learning model to predict precise irrigation depth (mm) per zone per day.
- Maintained soil moisture within agronomic bounds while minimizing water stress and over-irrigation.

Business vCard using QR Code | 09/2025–11/2025 *(Sansera Engineering Limited)*

- Developed a digital business vCard system that generates a QR code to instantly share contact details, reducing dependency on physical cards, with a user-friendly interface and secure data handling for quick access on any mobile device.
- Technologies used: Python, Flask, Java (Android), HTML5/CSS3, Jinja2, QR Code API, SMTP/SSL/TLS, Gunicorn, Gradle, and Render.

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank Software Engineer Certificate – HackerRank
- Version Control (Git & Workflows) – Meta (Coursera)
- Deep Learning with TensorFlow – Infosys Springboard
- Natural Language Processing for Developers / NLP using Python – Infosys Springboard
- Big Data Analytics Using Apache Spark – Infosys Springboard
- Elements of Aeronautics – Infosys Springboard • ZESTATHON-2025 Winner — Organized by ZESTECH
